Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I support Oregon's current mail-in voting system. I oppose revoking it and replacing it with in person voting. Oregon has had the most secure and convenient voting for over two decades. This encourages higher voter turn out. It saves the state millions. This is an attempt to suppress voting. Requiring in person voting on the day of the election clearly will make it a hardship to participate in elections. Mail in ballot makes voting more accessible to particular demographics, it does not significantly benefit one political party, and best practices exist for preventing fraud and improving reliability.
