Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I do not want to see mail voting eliminated in Oregon. I believe this is the most convenient, easiest, and safest way to vote with the least risk of fraud. I moved here 20 years ago from Texas where I had to stand in line on voting day and wait to vote on a computerized machine. This is not convenient at all, uses a computerized machine which can be hacked, and presents obstacles for many voters who do not have transportation or are not well enough to leave their home. I am very angry about the efforts in the last several years by Republicans to deprive Americans of their right to vote. I have seen states remove many people from the voter rolls and block votes cast from being counted. Their desire to do away with mail voting is just another way to try to prevent citizens from casting their votes. We have the right to vote. Voting by mail is easy and safe and it should be the way we vote in every state. Thank you.
