

Submitter: Jan Wainscott

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Now is the time for fossil fuel companies to pay their fair share for past climate change damages. This cost burden should not continue rest solely on Oregon taxpayers, while

fossil fuels companies continue making billions in profits.

The financial damages paid by the very large fossil fuel companies for climate change from 1995-2024 will be used to finance climate change adaptation and resilience projects.

These are critical for Oregon's future.
