Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As an active senior citizen I am in full support of voting at an official voting facility on the day of the election. When I moved to Oregon in 2018 I was shocked to find that I had it mail on my vote. Having lived in New York and California, I always voted at an official polling facility. I believe that my vote is secure when I slide my voting ballot into the machine at the voting center when I am done, I no longer trust the voting by mail.

I remember well, as a child going to the polling place with my parents, the polling place was crowded, and we waited in line patiently, and my parents voted. That moment that I remember has instilled my civil duty my civil right to vote. I don't feel that a mail in ballot is secure.

I support voting on the day of election.
