Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Really, we are wasting my time, your time and my money on this so-called bill? Please, its hard to even be respectful of the Senator that put this bill up for consideration. As it should not have a chance in hell in passing.

Our present voting system is more efficient (DOGE should LOVE it! Isn't it hilarious that they wouldn't!), more cost effective, provides greater accessibility (to many groups), and I would argue provides more opportunity for citizenry conversations about voting around the kitchen table especially where policy is concerned than the OLD model..Oh yes, so much better to go wait in line for an hour, where am I suppose to go??? And oh yeah don't forget to bring my voting pamphlet so I can remember how I am to vote!. Do I need a car? It's raining. Damn. Sugar melts. Do I have time to get dinner for the kids and then walk to my precinct (whatever that is! Where is that again?) But I digress. Hell no on this. This is BS.
