Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Though vote by mail is easy, the issues associated w/this method have manifested w/the 2 federal elections & in between. Some issues include: lack of adequate signature verification, accepting ballots after Election Day, multiple ballots to same address using a variety of names for 1 person, purposely not auditing voter database, non-citizens voting, etc. Need I continue? Recent elections show defeat of republicans by same margin in last several elections or democrats winning by same margin. Temptation to stuff ballot boxes or ballot drop boxes vandalized has occurred already. One or more of these methods result in cheating to benefit one political party over the other & you know it is. Continued mail-in voting steals the vote of Americans, diminishes representation of the voter, & draws us closer to the dreaded tyrannical authoritarian government that one political party screams about while rescinding our rights as Americans. If we continue this path, we will have taxation & every evil work w/o representation.
