Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Hello,

I am a working senior citizen living in Eugene, Oregon. I have been voting in all city/county/state/national elections since I turned 18 and could vote. At this time, I have a valid driver's license and could drive to an in person voting location where I could cast my ballot. However, I have been using a mail in ballot for quite a while. (Most weekdays I drive a far distance away from home and have found mail-in ballots more convenient.) But I know that probably in the not too distant future, I will not be working and/or driving. Using a mail in ballot would ensure that I could continue to participate in all city/county/state/national elections for the rest of my life. I have to imagine there are others like me who would feel robbed of their US voting right if voting in person became mandatory. I oppose this bill with all my heart.
