SB210

Oregon VBM system is one of the most efficient, least costly methods of voting across the entire country. Dismantling the Vote By Mail system makes no sense from either the fiscal side of the argument or the enfranchisement of voters side. This bill should never have been given a public hearing, and that it has been shows Oregon is still far too tolerant of intolerance. This bill being introduced shows just how far the Trump administration is willing to go to ensure that the only votes being cast are those they approve of. It was established during the 1980's that when more people are given a voice, that voice speaks out against Republican politicians and policies. Removing Oregon's vote by mail system would suppress more voices than it amplifies, therefore this bill should not be passed.
