Measure, Appointment or Topic:

SB210

I fully support SB210. Please restore election integrity to Oregon. Vote-by-mail is obviously not a secure method for elections. Every fraudulent vote cancels out a legitimate vote and goes against citizens' Constitutional rights. We Oregonians should be able to exercise the right to vote in person at the polls. Presenting a valid ID is required in many different places/settings; why not for voting? The voter rolls desperately need to be made accurate. We also have a right to know our state's complete election results on Election Night, as other states do and have done quite well for many decades and over the centuries ever since America's founding. Counting ballots for weeks after Election Day in Oregon is not acceptable. Completing and reporting the count on Election Night is definitely possible (as apparent in other states) and would restore trust and security to Oregon's entire election process.
