Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I don't support this measure to make in person voting the primary form of voting in Oregon. It would cause many physical barriers for rural voter's especially the aged, disabled, mobility issues, social anxiety, and those who lack their own reliable transportation. Many people cannot afford gas money. With little to no public transportation, they would be relying on family and friends. There is no evidence that this is an insecure voting method. The lie that it is, is based on fraudulent claims. Vote by mail was and is very secure and reliable. I would like to see it expanded in other states for its convenience and ability to allow all voters equal access to voting. This measure is nothing more than bending to the will of a minority who have been indoctrinated by Trump and his illegitimate fraud claims and the bill's proponents know that.
