

I write to state my unequivocal opposition to this obvious ploy by the political minority to nail down permanent control of this country no matter what it takes, legal or not. The gall of these people is astounding and their lack of love for democracy is supplanted by their lust for total control. They have been playing a long game since the 80s and are currently winning because we as the opposition continue to play by the rules. Its time to stop them from making ANY more headway to their goals. All we have left to fight them is our votes and that's why they want to make it as difficult as possible for most people to vote because they know they cant win in a fair fight. Please relegate this evil to the Senate recycling bin.
