On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3542

I support this measure. Being able to filter to the front of traffic is far safer for me at intersections, since I can get myself in front of traffic and avoid being hit from behind by a driver that isn't paying attention. This also allows me to get in front of traffic in case someone is impatient and starts going before I've started moving and I get hit from behind.
