We will never be able to assure voter integrity unless we end vote by mail and require ID to vote. We have no idea who is voting and Oregon refuses to be transparent with voting data. I have no trust for n the system. A system that's being sued because the voter rolls are dirty. Dead people shouldn't be voting. People shouldn't be voting for their spouse or their kids. The rest of the world votes in person and has to give ID because it's the only way to guarantee who votes. I'll gladly go to the polls every Election Day.
