SB210

Vote by mail is an excellent system that expands democracy by making voting accessible to those who may be unable to vote in person on Election Day. Many individuals have barriers such as child care, work obligations, transportation and more which interfere with in person voting. Eliminating vote by mail is voter suppression just like absurd laws in GA that criminalize giving a voter a drink of water while they stand in line. Let's go forward, not backward in our democracy. I have lived in states that require in person voting and our current system is far superior.
