

SB 210

As someone who remembers standing in long lines in bad weather, I say no to SB 210. Our County is 25% seniors. As an advocate for older Americans, subjecting them to this process again is simply trying to limit participation to voting. Seniors care, do vote and will notice.

Mail in also makes sure that there is a paper record of our votes if there are any questions about the vote. Mail-in voting is one of the safest and most secure ways to vote, and people can still drop off their ballots in person as well if they want to. The incidence of voter fraud is so incredibly low I would like to see real evidence of it before such a draconian system change.

Having more people vote than that might be, if they had to show up in person, is way more valuable. People care more if they have the chance to participate in the process. Quit trying to restrict peoples rights and ability to vote. Mail in voting is safe and secure.

Please vote NO on SB210
