Michele Lesser

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

One person, one vote. Not missing ballots, conditional voting not counted, fires in collection boxes, mail discovered in ditches, using dead people signatures.

One person. Identified as a legal, alive resident of our state, or local community
Doing their civic duty and casting a ballot, voicing their choices, in person with acceptable, current photo id.

One vote, on one day. Filled out, dropped into a secure box. Counted by a real person.

Our Founding Fathers understood how human nature works - how corruption happens, how greedy develops, and how easily the common man could be over run or ignored. They understood, because they were victims of a system who didn't listen to them, didn't care about them, didn't consider the needs and wants of the general populace.

Our Founding Fathers understood that first hand - and so a war was fought.

Fought to be heard. Recognized. Understood. And FREE.

One basic principle from our Founding Fathers boils down to one person, one vote.

The system we are using now has literally no guarantee that this principle is adhered to. There are far too many ways the mail voting system can be corrupted and manipulated.

There are far less ways an in-person, confirmed to in fact be that person, voting by hand at a box in a secure location can be corrupted.

And it's time we stop experimenting with "new" ways to do things when that way was not a problem in the first place.

If it works, don't fix it. If it's broken, fix it. But don't fix what wasn't broken...and the in person voting system was not broken.

Bring back in person with valid ID confirmation voting. Please.
