Measure, Appointment or Topic:

SB210

Vote by mail is incredibly important to make sure all citizens have the right to have their vote count. In person voting is a hardship for many people, such as elderly or disabled folks. But also hourly worker's that will not take time off work, or use PTO to go stand in line to cast their ballot. Some will just not go, especially if the voting poll is too far away. Vote by mail gives everyone the opportunity to sit down with their ballot on their time, and go through the voting pamphlet to make informed decisions, and have their voice heard. In person voting will have less people participating. We should never want that.
