Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I strongly oppose this measure for many reasons. The current system has been in place for many years and is working quite well. There have been very few incidents of any problems, and these were discovered and dealt with appropriately without any impact on election integrity or outcomes.

This change would make it difficult for many people to access voting, including myself, and this causes me to view this as a voter suppression effort... and this, quite frankly, makes me think anyone who supports this should be ashamed!
