SB210

I overwhelmingly support voter ID in person at the polls in order to cast a legal ballot . It's absurd to think anyone can get a ballot in the mail, maybe even 2 or 3 and illegally vote with no ID being produced. Some people have multiple homes and get a ballot at each address and vote as many times!

The integrity of our voting process in our State and Nation is at stake its a matter of national security.

We need to protect the rights of lawful citizens of the United States to participate legally in the election process.

Why should anyone NOT have to produce ID to vote when we all have to produce ID for everything else?

I worked on the election board at the polls in the 1970s and 80s and everyone who showed up to vote had to produce ID and sign for their paper Ballot. They had to prove who they were and their signature had to match what we had on file . It was a great system that protected the integrity of the voting process.

Voting ended at 8PM and the ballot boxes were sealed and delivered immediately to the elections office for counting.

There were no ballots showing up at all times of day or night for days after the election and after the Polls closed which made voting in Oregon a very honest process!
