Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Voting by mail should absolutely be maintained as it makes it possible for more people to vote. It is especially advantageous for people living in rural areas who live at a distance from polling centers and others who have physical disabilities which could prevent them from getting to the polling centers. Counting paper ballots has proven to be a valid and secure method of doing so with very little or no errors. It is imperative that Oregon maintain voting by mail.
