Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This bill is just another example of manipulating voters by creating more impossible rules around voting. Voting should include any and all possibilities for delivering a vote—by mail, in person, drop boxes open the period prior to day of voting, etc. This SB 210 is just another wrench in the works to end the democratic practice of voting. By making it more difficult for more people, the intent is to prevent the ease of voting. I oppose SB 210 and it's a bill that should NEVER even be considered in a democracy.
