

Submitter: Angela Bickford

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

You don't "fix" what isn't broken. Our current mail in voting system has been extremely well thought out, is very secure, and has been proven reliable over decades of use. We shouldn't let a few troublemakers and their gullible victims change an incredibly implemented, proven system be thrown out for no good reason.
