HB2583

My child chose a virtual public charter school after our local school failed to protect his physical safety. We researched several options and an online charter school best fit his learning needs, but this unfairly excludes his from crucial Student Success Act funding. HB 2583 fixes this by providing equal access to resources while ensuring funds stay in Oregon's community-run schools. It's time to support all students - no matter which type of school they choose to attend.
