

Submitter: Nancy Wood

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Mail in ballots allow people to vote without having to take time from work or have to find transportation to a voting place. And the validation method used to count and record ballots is well established and provides documentation. With all the controversy about voting machines, i have more trust in mail in ballots.

Any move to initiate revoking this process should come from the electorate and a greater number of requests than 1 legislator!!!
