Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Our current vote-by-mail system is excellent and should be retained. It has extremely low fraud rates and offers state residents the convenience to vote from home where they can research issues and candidates as they are voting. It also allows equal access for folks to vote regardless of their working hours or how far they would live from an in-person polling place. Switching to in-person only voting would drastically increase the difficulty in voting and depress turnout.
