

Submitter: Karl Hase

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

More accurately called VOTE FROM HOME, our VOTE BY MAIL system is secure, allows head-start counting, and produces a perfect paper trail. It is far superior to dispersed electronic voting systems, and mine is the opinion of an electrical engineer with 50 years experience putting to practice many electronic network security schemes.

Please DO NOT PRETEND TO FIX something that is NOT BROKEN. Our system should serve as the model of democracy for all other states to copy. And if the authors of this specious SB210 were instead sincere, they would be promoting our VOTE BY MAIL as the NATIONAL NORM for a fraud-proof democracy.

I am well studied of history and see SB210 as an dictator's dupe::"It's not who votes that counts, it's who counts the votes" said Stalin. STOP THIS !

Sincerely,  
Karl E. Hase
