SB210

To Whom it May Concern: Oregon's vote by mail system is a model for other states to follow. It allows the voters to make informed choices without having to worry about transportation costs, childcare costs, or the costs of time off from work required in order to vote in person. It has allowed our state to consistently have one of the highest voter turnouts in the country. This bill is nothing more than a disingenuous attempt to reduce access to voting by citizens who have the right to vote. I oppose this bill in the strongest terms possible.
