

Submitter:

MIKE SLAGLE

On Behalf Of:

This is common sense

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This bill is healthy for the trust of elections. Mail in voting is easily manipulated through loopholes in the voting process by advancing or delaying the election through early voting and the rules allowing votes to be counted after the election. Our election day has morphed into election month. Don't you see the loopholes that this process has created? Get back to election day, it can be done, in a more effective manner, in a day, rather than weeks of unsure results who in those results could have been manipulated by targeting ballot harvesting to change the results. Get back to common sense voting, keep it simple.
