SB210

It's time for Oregon Vote By Mail to go. Half the state doesn't trust it. There have been verified illegal immigrants registered to vote. Sure, it's only a few but that was the last straw. It is so easy for one person in a family to vote for everyone. To register their kids and fill out their ballots. To vote for mom in the nursing home. For dad with dementia. So one person could easily vote 5 or 6 times. Not to mention outright fraud of activists 'helping' people vote in group homes, homeless people or housing units then collecting the ballots and turning them in. Think of the influence these people have. I have personally witnessed people filling out ballots for their kids and parents. And the fact that ID is not required is ridiculous. Who knows if the person that filled out and sent in the ballot is really the person it was mailed to. Signature verification is not a science and done by a human that does it maybe once a year? It's a joke. Oregon has already lost the trust of it's voters with the corrupt scandal of Shamia Fagan and then finding out there were non citizens registered via the Motor Voter procedure. That was such a bad move to put that into place. Heck the voters voted to not let illegals get drivers licenses and then we give them licenses and register them to vote! As a 6th generation Oregonian I'm disgusted.
