

Submitter:

Erin Jordan

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Voting by mail hasn't been a problem and allows people plenty of time to really read through and decide what they want to vote for on their own time, with no pressure from polling booths. It also allows people to vote in advanced so they don't have to try to get the day off from work, and is significantly nicer for people with disabilities. Changing it would only result in less people being able to vote due to working or not being able to wait in extremely long lines. There's no reason to change this system which has been working fine for several decades. Please keep mail in voting.
