

Submitter:

Rebecca LohKamp

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This bill would make it impossible for myself and hundred of others who are house or facility bound to vote. I have worked my whole life until my illness and participated in my government ever since I was old enough. To take away my right to vote simply because I am physically unable to get to the poles is un-American, and WRONG. If I were physically able I would be there in person today to tell you just how wrong it is. We're still people, and we still have minds that can contribute to society even if our bodies are failing us. Don't silence us, our voices and our minds are still intact and have value.
