Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Voting by mail provides the voter the time to carefully review the issues and individuals on the ballot. It makes voting accessible to anyone regardless of health, disability, age or individuals who need to work voting day. It is convenient and saves time and transportation costs. No one wants to stand on the long lines we see that occurs in other states on voting day. It is a written document that provides irrefutable evidence if there is a need for a recount.
