Measure, Appointment or Topic:

SB210

Oregon's vote by mail system was historic when it was first implemented and has proven, through practice and time, to be extraordinarily effective. It opened the door to making voting much easier, inclusive and accessible. There is little evidence that this unique voting process leads to fraud or abuse of the voting system. The process works and data confirms that it increases voter turnout and participation. Obviously this Bill is sadly another attempt to restrict Oregonians from the election process by making it more difficult for them to vote. Thank you for your attention.
