Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

In person voting poses many obstacles for people to be able to participate in the election process. As a healthcare worker, it would create even more strain on an already struggling system if everyone needed to be off on one day to vote in person, for every election that happens. Mail in voting allows ease of access to every Oregonian and allows individuals to vote when they are available, as long as they are mailed back by the deadline.
