SB210

We should be proud that Oregon makes it possible for every legal voter to perform their duty as a citizen as easily as possible. The proof that it works is both the high voter participation and the finding that less than a dozen votes were cast by ineligible voters. It's a myth that voting by mail is an avenue for voting fraud.

I strongly approve of mail in voting and am strongly opposed to going back to voting in person.

The latest proposal from Washington to outlaw mail voting is unconstitutional.
