Senate Committee On Rules

Measure, Appointment or Topic:

SB210

The current system of voting is fair to all registered voters. As senior citizen, I can assure you that it is convenient and expedient. The ability to study and then vote the ballot in a non rushed manner is most appealing part of current system.

Voting in person will require standing in line. That is difficult if not impossible for a great number of the older and disabled citizens.

The proposal is deliberate attempt to prevent a certain community from voting. That community is the elderly or physically impaired. I SAY NO!!
