Measure, Appointment or Topic:

SB210

This is a blatantly discriminatory attempt to prevent Oregonians equal access to voting. What few ineligible voters Oregon had were the result of issues with DMV software, not because anyone tried to vote fraudulently. That means Oregon has had over 30 years worth of mail-in ballots with few issues, which is extremely impressive and shows an organized, well-run system. Additionally, studies have repeatedly shown that measures such as this one target Black, brown, and poor populations disproportionately, skewing elections towards Republicans and fascists.

If the only way you can win is by cheating, do you deserve to be in government at all?
