This bill is obviously a non-starter currently in our state. Vote by mail has had an impeccable history of accurate, safe, and accessible voting that drives participation for people from every walk of life. This bill is obviously an attempt by fascists looking for cracks to infiltrate even further than they have already. Recall Senator Smith for having the audacity to show his colors with this bill and investigate him for un-American activities. He deserves the Marine Le Pen treatment France just meted out.
