

Submitter: Jessica Scheler

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

This bill, eliminating mail in voting would take away people's ability to participate and vote in elections. Standing in line and voting in person on election day is not a feasible option for everyone. What about those who are public servants and work 12+ hour days, and not afforded time to go to a polling booth? What about those who are home bound? Those who do not have access to transportation? Those who are too frail to make the trip to stand in line? Those who are hospitalized during election time? Those out of town? Those caring for someone at home and not afforded the luxury of being able to leave them? Ending mail in voting would take away many people right and ability to participate in elections.
