SB210

In person voting does not make our elections more secure, it will only deter voters from voting. Requirements for in person voting will result in long lines that deter the elderly, hourly wage employees, the disabled and many others from their right to vote. There has been no concrete evidence to support that mail in ballots are an issue and there are already rigorous processes in place to detect fraud. Further there are appropriate consequences for fraudulent votes. This proposal is voter suppression, pure and simple and I demand, that as my representatives, you do not pass this. Thank you.
