On Behalf Of:	Oregonians
Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SB210

Even Jimmy Carter noted mail in voting was the most easy way to commit fraud. Two recent elections had ruined my faith in mail in voting. In 2020 when Steve Trout (easily the most knowledgeable subject matter expert on the Oregon election system) right in the middle of the result count for pointing out all of the problems with the system, including antiquated computers systems, showed that petty politics was allowed to rule over democratic processes. The multi-factor authentication system that had been set in motion by Dennis Richardson NEVER happened either.
In the recent 2024 elections, Multnomah county had record low turnout but still managed to decide the governor & president choices. Statistically not likely.
In short, I had no confidence in mail in ballots.
