Senate Committee On Rules

Measure, Appointment or Topic:

SB210

In-person voting keeps marginalized people out of the ballot box. This includes people who can't afford proper ID, who can't afford to skip work, who don't have transportation, who physically can't stand in line. Absentee ballots are not a good solution, as they require steps that many people won't take (through ignorance of the process or otherwise). In-person, day-of voting will drastically reduce civic engagement and voter turnout. Please reject it!
