Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As a senior citizen, I oppose this bill as it would cause hardship for myself and my wife. We are on medications and our health would be put at risk by having to stand in line in the Fall/Winter to vote in person. The current Oregon system works and any money spent to improve the voter registration should be spent refining the current system, not throwing it out and starting with a new system. This bill would cost taxpayers additional money to implement at every election and would likely increase the chance of voter fraud through use of fake ID.
