

I just moved here to Oregon and was very excited about mail in voting. I recently retired from active military service and have voted for the last 20+ years by mail using Federal absentee ballots. Voting by mail is another tool to ensure as much participation in our cherished civic processes as is possible. The statistics in Oregon show that voting by mail works for Oregonians and to strip that away would be an erosion to a free and fair process that has been executed faithfully with dedication and accuracy by our state employees. Don't take away another right of the people in this state. Voting by mail works and franchises voters.
