

Submitter:

Marsha Ackerlund

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I am in favor of tightening up our voting process to prevent abuse:

- Clearly, there should be no counting of votes that arrive subsequent to the date of the vote. Period. This is necessary to prevent fraud.

- It is high time we went back to in-person voting, and only allow vote by mail for someone requesting that privilege through the proper process.

- AND certainly one must present state-issued ID to be given either an in-person or an absentee ballot.

Additionally, the vote cast by anyone who is deceased should be discarded immediately--and prior to giving or sending a ballot, elections officials should check the data base--which presumes that the data base is brought up to date. Let's utilize the computing capabilities available and have elections personnel check the data base prior to issuing a ballot.

Please pass SB210 along and let We The People direct this, our fundamental, basic right. It is our number one way to direct our government... as established by our [wise] founders.
