

Submitter: Dylan Hendricks

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

This bill is emphatically against the will of the voters of Oregon and serves to only do them injustice and add barriers to voting. There is and has never been any evidence that large scale voter fraud has taken place in our election system in the United States and removing mail in voting does nothing to reduce potential harm. The state government does not have resources in Portland to make sure that everyone will be able to timely vote in person without extremely long lines and this will make it so less people will have their voice heard in our elections. I will stand up and ensure that the election system in Oregon does not take a step backwards in this way and makes our rights less convenient.
