

Submitter:

James Bass

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As an Oregon resident for the past 18 years, the mail-in voting process, as well as the ballot drop-off boxes has completely changed my attitude towards voting. No longer has it been an undue burden, disrupting my ability to work, and subsequently eliminating my ability to participate in the process. Oregon's system has allowed me to participate, and even encouraged my engagement and willingness and interest. To the best of my understanding, there has been almost NO fraud or abuse of the system, contrary to misinformation circulated. And this national push to take away voting rights is nothing short of fascistic and completely without legal, ethical, or moral merit. Voters should be provided with irrefutable evidence before this clearly political endeavor continues to erode our democracy, and alienate the very constituents that our representatives are elected, and PAID to serve.
