

Submitter:	Frank Oulman
On Behalf Of:	Myself
Committee:	House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic:	HB3940

Isn't it about time that our government looks at its current expenditures? It's not unlike our Federal Government as there's a lot of waste, abuse, and corruption within its operations. If it scaled back on inappropriate expenditures you wouldn't need to increase taxes. Wildfire protection in our state rates a high priority, along with public safety, and our business climate. Rethink the amount of funding provided the homeless, illegal immigrants, and other pet projects. Stop the tax and spend philosophy.
