Measure, Appointment or Topic:	SB210

Dear Politicians, Please do not end vote by mail. Many people are not in a position to takeoff from work and vote in person. I imagine it's also quite more expensive for the state to change the current voting practices. Many people don't have transportation. I am a physician. I can likely afford to have a chauffeur take me to vote. But part of being in a democracy and caring about each other is understanding, that not everyone has the same physical, mental ,and financial capabilities. Ending vote by mail is an unfair political move that does not belong in politics. Please don't sell out.
