Brian Cameron

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As a social worker who regularly sees the elderly and disabled, our statewide vote by mail is a functioning and shining example of where the entire nation should go with our elections. This enables the less fortunate American citizens to have their voices considered equally. I help provide this community with, quite literally, life saving Medicaid resources that mean the difference of life and death to my consumers.

Removing our vote by mail system is an effort led by those who aim to manipulate and control our democratic processes. Which ultimately erodes at our rights, individually.

Now, more than ever in our nation's history, do we require severe skepticism toward any effort to remove equity among the electorate. This is one of those efforts, make no mistake.

Keep vote by mail.
